

# Mateja Ivošević

Full Stack Developer

Novi Sad, Serbia · +381 69 4554024 · dev@matejaivosevic.com

## PROFILE

Full Stack Developer with 7+ years of experience building web and mobile applications with React, Next.js, Node.js and SQL. I have delivered enterprise platforms at EPAM, e-commerce and internal tools at Codeflex, and client projects as a Top Rated freelancer on Upwork. Frontend-heavy by background, but comfortable across the whole stack, from database design and access control to APIs, UI and deployment. I pick up new technologies quickly and currently focus on Supabase, PostgreSQL and LLM integrations.

## EXPERIENCE

**Full Stack Developer** · Codeflex, Novi Sad Mar 2025 – Present

- Designed, developed and maintain a production e-commerce web application end to end, covering frontend, backend and CMS
- Implement new features and ensure ongoing maintenance and stability of the system
- Work directly with the client to gather requirements and deliver tailored solutions
- Contributed to internal company tools built with PHP (Laravel)

**Freelance Full Stack Developer** · Upwork, Remote 2025 – Present

- Top Rated freelancer with a 5.0 client rating
- Develop a variety of web applications for clients, from new products to improvements of existing systems
- Work in direct communication with clients, from gathering requirements to delivery

**Full Stack Developer** · EPAM Systems, Novi Sad Jun 2022 – Dec 2024

- Built and maintained complex enterprise applications with React and Next.js, applying advanced state management and performance optimizations
- Worked on the AdInsure insurance platform, the open-source Ketcher chemical structure editor and the Bebac.com parenting platform
- Designed and executed testing strategies with Jest to ensure application reliability
- Improved database efficiency by writing optimized SQL queries and refining schemas
- Took part in system architecture discussions and technical decision-making with cross-functional teams

## SKILLS

## EXPERIENCE

---

### Full Stack Developer · Vivify Ideas, Novi Sad

Dec 2020 – Jun 2022

- Developed and maintained web applications with React and Redux, Node.js, Django and C#
- Built an organisation management system for task tracking and contact management
- Created and maintained SQL queries and scripts for data management
- Designed responsive, user-friendly interfaces and improved stability with Jest tests

### Full Stack Developer Intern · OCTA IT Sourcing, Novi Sad

May 2019 – Apr 2020

- Developed features for Quizando, a real-time online trivia platform, using Angular 2+, Node.js and NoSQL databases (DynamoDB)

## PERSONAL PROJECT

---

### Kalori · kaloriapp.com

Live on Google Play, iOS coming soon

My first solo product: a mobile calorie and macro tracker with AI-powered food logging by text or voice, weight progress with photos and timeframe-based calorie planning.

Built with React Native (Expo) and TypeScript on a Supabase backend (PostgreSQL, custom RLS policies, Google OAuth, Deno Edge Functions). Integrated OpenAI Whisper for voice transcription and Claude for nutrition parsing and recommendations, with RevenueCat subscriptions, TanStack Query and Sentry. Full product ownership from architecture to store release.
